Safety Data Sheet according to Regulation (EC) No. 453/2010

Revision date: 21/09/2011

Version: 1.0

SECT	ION 1: Identification of the sub	bstance/mixture and of the company/undertaking		
1.1.	Product identifier			
Product	form	: Mixture		
Trade n	ame	: Quicksilver Synthetic Blend 4-Stroke Outboard Oil, SAE 25W-40		
Product	code	: 625676316; 92-858000; 92-858052Q01; 92-858053Q01; 92-858054Q01; 92-858055Q01		
Synony	ms	: Motor oil		
1.2.	Relevant identified uses of the substance or mixture and uses advised against			
1.2.1.	Relevant identified uses			
		Marine and Watercraft Applications		
1.2.2.	Uses advised against			
No addi	tional information available			
1.3.	Details of the supplier of the safety	data sheet		
Mercury	/ Marine			
41-71 B	essemer Drive Dandenong South Vic			
Australi 3175	а			
	791 5822			
1.4.	Emergency telephone number			
Emerge	ncy number	: Chemtrec Australia (Sydney) +(61) 290372994 (24 hour service)		
SECT	ION 2: Hazards identification			
2.1.	Classification of the substance or n	nixture		
Classif	ication according to Regulation (EC) I	No. 1272/2008 [CLP]		
Not clas	ssified			
Classif	ication according to Directive 67/548/I	Classification according to Directive 67/548/EEC or 1999/45/EC		
Not classified				
Not clas	•	EEC or 1999/45/EC		
	ssified			
Advers	ssified e physicochemical, human health and	d environmental effects

Spills of this product present a serious slipping hazard. Repeated or prolonged skin contact may cause dermatitis and defatting. Injection under the skin of pressurized hydrocarbons can cause severe, permanent tissue damage. Vapours can travel considerable distances to a source of ignition where they can ignite, flash back, or explode.		

3.1. Substances

Not applicable

3.2. Mixtures			
Name	Product identifier	%	Classification according to Directive 67/548/EEC
Zinc alkyl dithiophosphate	(CAS No.) 68649-42-3 (EC no) 272-028-3	0.604 - 1.19592	Xn; R22
Name	Product identifier	%	Classification according to Regulation (EC) No. 1272/2008 [CLP]
Zinc alkyl dithiophosphate	(CAS No.) 68649-42-3 (EC no) 272-028-3	0.604 - 1.19592	Acute Tox. 4 (Oral), H302

Full text of R-, H- and EUH-phrases: see section 16.

Safety Data Sheet according to Regulation (EC) No. 453/2010

SECTION 4: First aid measures		
4.1. Description of first aid measures		
First-aid measures after inhalation	pected to present a significant inhalation hazard under a case of excessive inhalation of fumes move the person	
First-aid measures after skin contact	ct burns from hot or very cold materials should be floode nutes. After contact with skin, take off immediately all cor- diately with plenty of water and soap. Seek medical atten ops. Discard contaminated leather articles. Wash contam al is injected under the skin, seek medical attention imme	taminated clothing, and wash tion if ill effect or irritation inated clothing before reuse. If
First-aid measures after eye contact	immediately and thoroughly, pulling the eyelids well awa um). Remove contact lenses, if present and easy to do. (on if ill effect or irritation develops.	
First-aid measures after ingestion	t induce vomiting unless directed to do so by medical per scious person anything to drink. Seek medical attention i	
4.2. Most important symptoms and effe	cute and delayed	
Symptoms/injuries after inhalation	tion of mists or vapours at elevated temperatures may ca	use respiratory irritation.
Symptoms/injuries after skin contact	ause slight temporary irritation. The hot liquid may cause ged skin contact may cause dermatitis and defatting.	severe skin burns. Repeated or
Symptoms/injuries after eye contact	ause slight temporary irritation. Symptoms can include re	dness, pain, and tearing.
Symptoms/injuries after ingestion	ion of large amounts may produce some discomfort and ng a laxative action.	gastrointestinal disturbances

4.3. Indication of any immediate medical attention and special treatment needed

Injection under the skin of pressurized hydrocarbons can cause severe, permanent tissue damage. Aspiration is not expected with this material due to the viscosity (thickness) of this mixture.

SECTION 5: Firefighting measures			
5.1. Extinguishing media			
Suitable extinguishing media:	: carbon dioxide (CO2), dry chemical powder, foam. Water fog. Use caution when applying carbon dioxide in confined spaces. Carbon dioxide can displace oxygen.		
Unsuitable extinguishing media	: Do not use a solid water stream as it may scatter and spread fire. Apply aqueous extinguishing media carefully to prevent frothing/steam explosion.		
5.2. Special hazards arising from the s	ubstance or mixture		
Fire hazard	: Material will burn but does not easily ignite. Mist or spray may burn at temperature below flash point. On combustion forms: Carbon dioxide. Carbon monoxide. hydrocarbons. Nitrogen oxides (NOx). Phosphorus oxides. Sulfur oxides. Zinc oxide.		
Explosion hazard	: Exposed to ignition source, vapours can burn in open / explode if confined. Risk of explosion if heated in a confined system. Vapours can travel considerable distances to a source of ignition where they can ignite, flash back, or explode.		
Reactivity	: None known under normal conditions of use.		
5.3. Advice for firefighters			
Firefighting instructions	: Risk of explosion if heated under confinement. At or above flash point, vapours present may burn in open or explode if confined when mixed with air and exposed to ignition source.		
Protective equipment for firefighters	: In case of fire: Wear self-contained breathing apparatus. Wear proper protective equipment. Refer to section 8.		
SECTION 6: Accidental release measures			
SECTION 6: Accidental release me	asures		
	asures equipment and emergency procedures		
6.1. Personal precautions, protective e			
6.1.Personal precautions, protective e6.1.1.For non-emergency personnel	equipment and emergency procedures		
6.1.Personal precautions, protective e6.1.1.For non-emergency personnelProtective equipment	 Wear suitable protective clothing, gloves and eye/face protection. Refer to section 8. Avoid all eye and skin contact and do not breathe vapour and mist. High slip hazard because of leaking or spilled product. Stop leak if safe to do so. Soak up with absorbent material (for example sand, sawdust, neutral absorbent granule, silica gel). Large quantities: Contain large 		
 6.1. Personal precautions, protective e 6.1.1. For non-emergency personnel Protective equipment Emergency procedures 	 Wear suitable protective clothing, gloves and eye/face protection. Refer to section 8. Avoid all eye and skin contact and do not breathe vapour and mist. High slip hazard because of leaking or spilled product. Stop leak if safe to do so.  6.1. Personal precautions, protective et 6.1.1. For non-emergency personnel Protective equipment Emergency procedures 6.1.2. For emergency responders 	 Wear suitable protective clothing, gloves and eye/face protection. Refer to section 8. Avoid all eye and skin contact and do not breathe vapour and mist. High slip hazard because of leaking or spilled product. Stop leak if safe to do so. Soak up with absorbent material (for example sand, sawdust, neutral absorbent granule, silica gel). Large quantities: Contain large spillage with sand or earth. 		
 6.1. Personal precautions, protective e 6.1.1. For non-emergency personnel Protective equipment Emergency procedures 6.1.2. For emergency responders Protective equipment 6.2. Environmental precautions 	 Wear suitable protective clothing, gloves and eye/face protection. Refer to section 8. Avoid all eye and skin contact and do not breathe vapour and mist. High slip hazard because of leaking or spilled product. Stop leak if safe to do so. Soak up with absorbent material (for example sand, sawdust, neutral absorbent granule, silica gel). Large quantities: Contain large spillage with sand or earth. 		
 6.1. Personal precautions, protective e 6.1.1. For non-emergency personnel Protective equipment Emergency procedures 6.1.2. For emergency responders Protective equipment 6.2. Environmental precautions 	 Wear suitable protective clothing, gloves and eye/face protection. Refer to section 8. Avoid all eye and skin contact and do not breathe vapour and mist. High slip hazard because of leaking or spilled product. Stop leak if safe to do so. Soak up with absorbent material (for example sand, sawdust, neutral absorbent granule, silica gel). Large quantities: Contain large spillage with sand or earth. Wear suitable protective clothing, gloves and eye/face protection. Refer to section 8. 		

Safety Data Sheet according to Regulation (EC) No. 453/2010

Methods for cleaning up	: Absorb remaining liquid with sand or inert absorbent and remove to safe place. Do not empty into drains or the aquatic environment. Minimize water use for cleaning.
Other information	: Comply with local regulations for disposal.
6.4. Reference to other sections	
Refer to sections 8 and 13.	
SECTION 7: Handling and stora	ge
7.1. Precautions for safe handling	
Precautions for safe handling	: Store in tightly closed, properly ventilated containers away from heat, sparks, open flame. Do not pipette liquid using a mouth pipette. Avoid contact with skin, eyes and clothing. Handle in accordance with good industrial hygiene and safety procedures. Keep away from clothing as we as other incompatible materials. Handle empty containers with care because residual vapours are flammable. Do not pressurize, cut, weld, braze, solder, drill, grind, or expose containers to flames, sparks, heat, or other potential ignition sources. Wash hands and other exposed areas with mild soap and water before eat, drink or smoke and when leaving work.
Hygiene measures	: Wash hands thoroughly after handling. DO NOT use gasoline, kerosene, solvents, or harsh abrasives as skin cleansers.
7.2. Conditions for safe storage, in	ncluding any incompatibilities
Technical measures:	: Provide adequate ventilation. Store at ambient temperature.
Storage condition(s)	 Keep container tightly closed in a cool, well-ventilated place. Only use containers approved for especially this product. Protect from sunlight. Protect containers against damage. Store at room temperature.
Incompatible materials	: Oxidizing agents.
7.3. Specific end use(s)	
refer to section 1.	
SECTION 8: Exposure controls/	personal protection
8.1. Control parameters	
No additional information available	

8.2. Exposure controls	
Appropriate engineering controls	: Provide local exhaust or general room ventilation to minimize vapour concentrations. Emergency eye wash fountains and safety showers should be available in the immediate vicinity of any potential exposure.
Personal protective equipment	: Gloves. Protective clothing. Safety glasses.
Hand protection	: Not required for normal conditions of use. For prolonged contact, use nitrile or neoprene gloves or other material resistant to petroleum oils. Use heat-protective gloves when handling product a elevated temperatures.
Eye protection	: safety glasses with side-shields. Use splash goggles when eye contact due to splashing is possible. Wear goggles and face shield when handling material at elevated temperatures.
Skin and body protection	: Avoid repeated or prolonged skin contact. Wear suitable protective clothing. Wear long sleeves. Wash contaminated clothing before reuse. Discard contaminated leather articles.
Respiratory protection	: With correct and proper use, and under normal conditions, breathing protection is not required. An approved organic vapour respirator/supplied air or self-contained breathing apparatus must be used when vapour concentration exceeds applicable exposure limits.
Environmental exposure controls	: Avoid release to the environment.

SECTION 9: Physical and chemical properties		
9.1. Information on basic physical and chemical properties		
Physical state	: Liquid	
Colour	: amber.	
Odour	: Light odour of petroleum.	
Odour threshold	: No data available	
рН	: Not applicable	
Melting point	: No data available	
Solidification point	: No data available	
Boiling point	: No data available	
Flash point	: 200 °C Closed cup	
Relative evaporation rate (butylacetate=1)	: No data available	

Safety Data Sheet

according to Regulation (EC) No. 453/2010

Flammability (solid, gas)	: No data available
Explosive limits	: No data available
Vapour pressure	: 0.001 kPa (at 20 °C)
Relative vapour density at 20 °C	: > 1 (Air = 1)
Relative density	: 0.89 g/cm ³ (water =1)
Solubility	: Water: Negligible.
Log Pow	: No data available
Log Kow	: No data available
Self ignition temperature	: No data available
Decomposition temperature	: No data available
Viscosity, kinematic	: 145 cSt (at 40 °C)
Viscosity, dynamic	: No data available
Explosive properties	: No data available
Oxidising properties	: No data available
0	

9.2. **Other information**

No additional information available

SECTION 10: Stability and reactivity

10.1. Reactivity

None known under normal conditions of use.

10.2. **Chemical stability**

Stable at normal conditions.

10.3. Possibility of hazardous reactions

None known.

10.4. **Conditions to avoid**

No flames, No sparks. Eliminate all sources of ignition. avoid heat source. Direct sunlight.

10.5. Incompatible materials

Oxidizing agents, strong.

10.6. Hazardous decomposition products

On combustion, forms: Carbon monoxide. carbon dioxide (CO2). Nitrogen oxides (NOx). hydrocarbons. Sulfur oxides. Phosphorus oxides. Zinc oxide. No hazardous decomposition products under suitable storage and usage conditions as prescribed.

SECTION 11: Toxicological information		
11.1. Information on toxicological effects		
Acute toxicity	: Not classified	
Zinc alkyl dithiophosphate (68649-42-3)		
LD50 oral rat	1800 mg/kg	
LD50 dermal rabbit	< 3000 mg/kg	
Skin corrosion/irritation	: Not classified	
	pH: Not applicable	
Serious eye damage/irritation	: Not classified	
	pH: Not applicable	
Respiratory or skin sensitisation	: Not classified	
Germ cell mutagenicity	: Not classified	
Carcinogenicity	: Not classified	
Reproductive toxicity	: Not classified	
Specific target organ toxicity (single exposure)	: Not classified	
Specific target organ toxicity (repeated exposure)	: Not classified	
Aspiration hazard	: Not classified	
Potential Adverse human health effects and symptoms	: May produce skin irritation. May cause minor eye irritation. Repeated or prolonged skin contact may cause dermatitis and defatting. Inhalation of mists or vapours at elevated temperatures may cause respiratory irritation. Injection under the skin of pressurized hydrocarbons can cause severe, permanent tissue damage. The hot liquid may cause severe skin burns.	

Safety Data Sheet

according to Regulation (EC) No. 453/2010 **SECTION 12: Ecological information** Toxicity 12.1. : In case of large spills the product may be hazardous to aquatic organisms due to possible Ecology - water formation of a film on the surface water which can diminish dissolved oxygen levels. 12.2. Persistence and degradability No additional information available **Bioaccumulative potential** 12.3. No additional information available 12.4. Mobility in soil No additional information available 12.5. Results of PBT and vPvB assessment No additional information available Other adverse effects 12.6. No additional information available SECTION 13: Disposal considerations Waste treatment methods 13.1. Regional legislation (waste) : Consult the appropriate authorities about waste disposal. Dispose of this material and its container to hazardous or special waste collection point. Waste disposal recommendations Do not pressurize, cut, weld, braze solder, drill, grind, or expose containers to flames, sparks, heat, or other potential ignition sources. Do not re-use empty containers. Empty containers should be taken for recycle, recovery or waste in accordance with local regulation. Handle empty containers with care because residual vapours are flammable. SECTION 14: Transport information Not a dangerous good in sense of transport regulations. SECTION 15: Regulatory information Safety, health and environmental regulations/legislation specific for the substance or mixture 15.1. 15.1.1. EU-Regulations Contains no REACH candidate substance Compliance with following regulations: Regulation (EC) 1907/2006 as amended. Regulation (EC) Other regulations, restrictions and prohibition ٠ 1272/2008 as amended. Directive 67/548/EEC as amended. Directive 1999/45/EC as amended. regulations 15.1.2. National regulations **Regional legislation** : National Code of Practice for the Preparation of Material Safety Data Sheets [NOHSC:2011(2003)]. Adopted National Exposure Standard for Atmospheric Contaminants in the Occupational Environment [NOHSC:1003 (1995)]. 15.2. **Chemical safety assessment** No additional information available **SECTION 16: Other information** Sources of Key data : Supplier. MSDS. CLP - Classification, Labelling and Packaging. EC - European Community. EEC - European Abbreviations and acronyms Economic Community. REACH - Registration, Evaluation, Authorisation and Restriction of Chemicals. SDS - Safety Data Sheet. Full text of R-, H- and EUH-phrases:

Acute Tox. 4 (Oral)	Acute toxicity (oral) Category 4
H302	Harmful if swallowed
R22	Harmful if swallowed.

This information is based on our current knowledge and is intended to describe the product for the purposes of health, safety and environmental requirements only. It should not therefore be construed as guaranteeing any specific property of the product.
