Safety Data Sheet according to Regulation (EC) No. 453/2010 Revision date: 01/09/2011

Supersedes: 10/05/2011

Version: 1.0

						. 1.0
SECTION 1: Iden	tification of the sub	stance/mixture and of	the company/u	ndertaking		
.1. Product ide						
Product form		: Mixture				
rade name		: Quicksilver Verado 4T Er	igine Oil, SAE 25W-5	0		
Product code		: 92-881142; 92-858119Q0)1			
Synonyms		: Engine oil, Motor oil				
I.2. Relevant ide	entified uses of the subst	tance or mixture and uses a	advised against			
.2.1. Relevant ide	entified uses					
Jse of the substance/p	oreparation	: Marine and Watercraft Ap	oplications			
.2.2. Uses advise	ed against					
lo additional informati	-					
		lata shoot				
Aercury Marine	ne supplier of the safety d

Full text of R-, H- and EUH-phrases: see section 16.

SECTION 4: First aid measures				
4.1. Description of first aid measures				
First-aid measures after inhalation :	Not expected to present a significant inhalation hazard under anticipated conditions of normal use. In case of excessive inhalation of fumes move the person to fresh air.			
First-aid measures after skin contact :	Contact burns from hot or very cold materials should be flooded with cool low pressure water for 15 minutes. After contact with skin, take off immediately all contaminated clothing, and wash immediately with plenty of water and soap. Seek medical attention if ill effect or irritation develops. Discard contaminated leather articles. Wash contaminated clothing before reuse. If material is injected under the skin, seek medical attention immediately.			
First-aid measures after eye contact :	Rinse immediately and thoroughly, pulling the eyelids well away from the eye (15 minutes minimum). Remove contact lenses, if present and easy to do. Continue rinsing. Seek medical attention if ill effect or irritation develops.			
First-aid measures after ingestion :	Do not induce vomiting unless directed to do so by medical personnel. Do not give an unconscious person anything to drink. Seek medical attention immediately.			
4.2. Most important symptoms and effects,	, both acute and delayed			
Symptoms/injuries after inhalation :	Inhalation of mists or vapours at elevated temperatures may cause respiratory irritation.			
Symptoms/injuries after skin contact :	May cause slight temporary irritation. The hot liquid may cause severe skin burns. Repeated or prolonged skin contact may cause dermatitis and defatting.			
Symptoms/injuries after eye contact :	May cause slight temporary irritation. Symptoms can include redness, pain, and tearing.			
Symptoms/injuries after ingestion :	Ingestion of large amounts may produce some discomfort and gastrointestinal disturbances including a laxative action.			

4.3. Indication of any immediate medical attention and special treatment needed

Injection under the skin of pressurized hydrocarbons can cause severe, permanent tissue damage. Aspiration is not expected with this material due to the viscosity (thickness) of this mixture.

SECTION 5: Firefighting measures	
5.1. Extinguishing media	
Suitable extinguishing media:	: carbon dioxide (CO2), dry chemical powder, foam. Water fog. Use caution when applying carbon dioxide in confined spaces. Carbon dioxide can displace oxygen.
Unsuitable extinguishing media	: Do not use a solid water stream as it may scatter and spread fire. Apply aqueous extinguishing media carefully to prevent frothing/steam explosion.
5.2. Special hazards arising from the sul	bstance or mixture
Fire hazard	: Material will burn but does not easily ignite. Mist or spray may burn at temperature below flash point. On combustion forms: Carbon dioxide. Carbon monoxide. hydrocarbons. Nitrogen oxides (NOx). Phosphorus oxides. Sulfur oxides. Zinc oxide.
Explosion hazard	: Exposed to ignition source, vapours can burn in open / explode if confined. Risk of explosion if heated in a confined system. Vapours can travel considerable distances to a source of ignition where they can ignite, flash back, or explode.
Reactivity	: None known under normal conditions of use.
5.3. Advice for firefighters	
Firefighting instructions	: Risk of explosion if heated under confinement. At or above flash point, vapours present may burn in open or explode if confined when mixed with air and exposed to ignition source.
Protective equipment for firefighters	: In case of fire: Wear self-contained breathing apparatus. Wear proper protective equipment. Refer to section 8.

Safety Data Sheet according to Regulation (EC) No. 453/2010

SECTI	SECTION 6: Accidental release measures			
6.1.	1. Personal precautions, protective equipment and emergency procedures			
6.1.1.	For non-emergency personnel			
Protectiv	e equipment	Wear suitable protective clothing, gloves and eye/face protection. Refer to section 8.		
Emerger	ncy procedures	Avoid all eye and skin contact and do not breathe vapour and mist. High slip hazard because of leaking or spilled product. Stop leak if safe to do so. Soak up with absorbent material (for example sand, sawdust, neutral absorbent granule, silica gel). Large quantities: Contain large spillage with sand or earth.		
6.1.2.	For emergency responders			
Protectiv	e equipment	Wear suitable protective clothing, gloves and eye/face protection. Refer to section 8.		
6.2.	Environmental precautions			
Do not d	ischarge into surface water. Relevant wa	r authorities should be notified of any large spillage to water course or drain.		
6.3.	Methods and material for containment	and cleaning up		
For cont	ainment	Stop leak if safe to do so. The final disposal of this material should be supervised by a specialist, following applicable environmental legislation. Clean up any spills as soon as possible, using an absorbent material to collect it. Prevent spreading over great surfaces (e.g. by damming or installing oil booms).		
Methods	for cleaning up	Absorb remaining liquid with sand or inert absorbent and remove to safe place. Do not empty into drains or the aquatic environment. Minimize water use for cleaning.		
Other inf	ormation	Comply with local regulations for disposal.		
6.4.	Reference to other sections			
Refer to	Refer to sections 8 and 13.			
SECTI	ON 7: Handling and storage			
7.1.	Precautions for safe handling			
Precauti	ons for safe handling	Store in tightly closed, properly ventilated containers away from heat, sparks, open flame. Do not pipette liquid using a mouth pipette. Avoid contact with skin, eyes and clothing. Do not pressurize, cut, weld, braze, solder, drill, grind, or expose containers to flames, sparks, heat, or other potential ignition sources. Handle empty containers with care because residual vapours are flammable. Handle in accordance with good industrial hygiene and safety procedures. Wash hands and other exposed areas with mild soap and water before eat, drink or smoke and when leaving work. Keep away from clothing as well as other incompatible materials.		
Hygiene	measures	Wash hands thoroughly after handling. DO NOT use gasoline, kerosene, solvents, or harsh abrasives as skin cleansers.		
7.2.	Conditions for safe storage, includin	any incompatibilities		
Technica	al measures:	Provide adequate ventilation. Store at ambient temperature.		
Storage	condition(s)	Keep container tightly closed in a cool, well-ventilated place. Only use containers approved for especially this product. Do not store near oxidizing agents. Protect from sunlight. Protect containers against damage. Keep away from heat/sparks/open flames/hot surfaces No smoking.		
Incompa	tible materials	Oxidizing agents.		
7.3.	Specific end use(s)			

refer to section 1.

SECTION 8: Exposure controls/personal protection				
8.1. Control parameters				
Quicksilver Verado 4T Engine Oil, SAE 25W-50				
Australia	TWA (mg/m³)		5 mg/m³ Oil Mist	
8.2. Exposure controls				
Appropriate engineering controls : Provide local exhaust or general room ventilation to minimize vapour concentrations. Emergency eye wash fountains and safety showers should be available in the immediate vicinity of any				

potential exposure.

Safety Data Sheet according to Regulation (EC) No. 453/2010

Personal protective equipment	: Gloves. Protective clothing. Safety glasses.
Hand protection	 Not required for normal conditions of use. For prolonged contact, use nitrile or neoprene gloves or other material resistant to petroleum oils. Use heat-protective gloves when handling product at elevated temperatures.
Eye protection	 safety glasses with side-shields. Use splash goggles when eye contact due to splashing is possible. Wear goggles and face shield when handling material at elevated temperatures.
Skin and body protection	: Avoid repeated or prolonged skin contact. Wear suitable protective clothing. Wear long sleeves. Wash contaminated clothing before reuse. Discard contaminated leather articles.
Respiratory protection	: With correct and proper use, and under normal conditions, breathing protection is not required. An approved organic vapour respirator/supplied air or self-contained breathing apparatus must be used when vapour concentration exceeds applicable exposure limits.
Environmental exposure controls	: Avoid release to the environment.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and	chemical properties
Physical state	: Liquid
Colour	: amber. Dark. amber coloured.
Odour	: Light odour of petroleum.
Odour threshold	: No data available
рН	: Not applicable
Melting point	: No data available
Solidification point	: No data available
Boiling point	: No data available
Flash point	: 240 °C Closed cup.
Relative evaporation rate (butylacetate=1)	: No data available
Flammability (solid, gas)	: No data available
Explosive limits	: No data available
Vapour pressure	∶ < 0.1 kPa (at 20 °C)
Relative vapour density at 20 °C	: > 1 (Air = 1)
Relative density	: 0.89 g/cm ³ (water =1)
Solubility	: Water: Negligible.
Log Pow	: No data available
Log Kow	: No data available
Self ignition temperature	: No data available
Decomposition temperature	: No data available
Viscosity, kinematic	: 206 cSt (at 40 °C)
Viscosity, dynamic	: No data available
Explosive properties	: No data available
Oxidising properties	: No data available
9.2. Other information	
No additional information available	

SECTI	SECTION 10: Stability and reactivity				
10.1.	Reactivity				
None kn	own under normal conditions of use.				
10.2.	Chemical stability				
Stable a	t normal conditions.				
10.3.	Possibility of hazardous reactions				
None kn	own.				

Safety Data Sheet

according to Regulation (EC) No. 453/2010

10.4. Conditions to avoid

No flames, No sparks. Eliminate all sources of ignition. avoid heat source. Direct sunlight.

10.5. Incompatible materials

Oxidizing agents, strong.

10.6. Hazardous decomposition products

On combustion, forms: Carbon monoxide. carbon dioxide (CO2). Nitrogen oxides (NOx). hydrocarbons. Sulfur oxides. Phosphorus oxides. Zinc oxide. No hazardous decomposition products under suitable storage and usage conditions as prescribed.

SECTION 11: Toxicological information

11.1.	Information on toxicological effects	5	
Acute tox	kicity	:	Not classified

Zinc alkyl dithiophosphate (68649-42-3)		
LD50 oral rat	180	00 mg/kg
LD50 dermal rabbit	< 3	3000 mg/kg
Skin corrosion/irritation :		ot classified
	pН	I: Not applicable
Serious eye damage/irritation	: No	ot classified
	pН	I: Not applicable
Respiratory or skin sensitisation	: No	ot classified
Germ cell mutagenicity	: No	ot classified
Carcinogenicity	: No	ot classified
Reproductive toxicity	: No	ot classified
Specific target organ toxicity (single exposure)	: No	ot classified
Specific target organ toxicity (repeated exposure)	: No	ot classified
Aspiration hazard	: No	ot classified
Potential Adverse human health effects and symptoms	ma cai	ay produce skin irritation. May cause minor eye irritation. Repeated or prolonged skin contact ay cause dermatitis and defatting. Inhalation of mists or vapours at elevated temperatures may use respiratory irritation. Injection under the skin of pressurized hydrocarbons can cause vere, permanent tissue damage. The hot liquid may cause severe skin burns.

SECT	ON 12: Ecological information	
12.1.	Toxicity	
Ecology	- water	: In case of large spills the product may be hazardous to aquatic organisms due to possible formation of a film on the surface water which can diminish dissolved oxygen levels.
2.2.	Persistence and degradability	
lo addi	tional information available	
2.3.	Bioaccumulative potential	
No addi	tional information available	
12.4.	Mobility in soil	
No addi	tional information available	
2.5.	Results of PBT and vPvB assessment	t
lo addit	tional information available	
2.6.	Other adverse effects	
lo addi	tional information available	
SECTI	ON 13: Disposal considerations	5
3.1.	Waste treatment methods	
Regiona	l legislation (waste)	: Consult the appropriate authorities about waste disposal. Dispose of this material and its container to hazardous or special waste collection point.
Waste d	isposal recommendations	: Do not pressurize, cut, weld, braze solder, drill, grind, or expose containers to flames, sparks, heat, or other potential ignition sources. Do not re-use empty containers. Empty containers should be taken for recycle, recovery or waste in accordance with local regulation. Handle emp containers with care because residual vapours are flammable.
2/09/20	11	ALL (English) 5

Safety Data Sheet according to Regulation (EC) No. 453/2010

SECTION 14: Transport information						
Not a dangerous good in sense of transport regulations.						
SECTION 15: Regulatory information						
15.1. Safety, health and environmental	.1. Safety, health and environmental regulations/legislation specific for the substance or mixture					
15.1.1. EU-Regulations						
Contains no REACH candidate substance						
Other regulations, restrictions and prohibition regulations	: Compliance with following regulations: Regulation (EC) 1907/2006 as amended. Regulation (EC) 1272/2008 as amended. Directive 67/548/EEC as amended. Directive 1999/45/EC as amended.					
15.1.2. National regulations						
Regional legislation	 National Code of Practice for the Preparation of Material Safety Data Sheets [NOHSC:2011(2003)]. Adopted National Exposure Standard for Atmospheric Contaminants in the Occupational Environment [NOHSC:1003 (1995)]. 					
15.2. Chemical safety assessment						
No additional information available						

SECTION 16: Other information

Sources of Key data	: MSDS.
Abbreviations and acronyms	: CLP - Classification, Labelling and Packaging. EC - European Community. EEC - European Economic Community. REACH - Registration, Evaluation, Authorisation and Restriction of Chemicals. SDS - Safety Data Sheet.

Full text of R-, H- and EUH-phrases:

Aguta Tay 4 (Oral)	Agute tayloity (are) Cotegory 4
Acute Tox. 4 (Oral)	Acute toxicity (oral) Category 4
Aquatic Acute 1	Hazardous to the aquatic environment - Acute Hazard Category 1
Aquatic Chronic 1	Hazardous to the aquatic environment - Chronic Hazard Category 1
Aquatic Chronic 3	Hazardous to the aquatic environment - Chronic Hazard Category 3
Eye Dam. 1	Serious eye damage/eye irritation Category 1
Repr. 2	Reproductive toxicity Category 2
Skin Irrit. 2	skin corrosion/irritation Category 2
Skin Sens. 1	Skin sensitisation Category 1
H302	Harmful if swallowed
H315	Causes skin irritation
H317	May cause an allergic skin reaction
H318	Causes serious eye damage
H361f	Suspected of damaging fertility.
H400	Very toxic to aquatic life
H410	Very toxic to aquatic life with long lasting effects
H412	Harmful to aquatic life with long lasting effects
R22	Harmful if swallowed.
R38	Irritating to skin.
R41	Risk of serious damage to eyes.
R43	May cause sensitisation by skin contact.
R50/53	Very toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment.
R52/53	Harmful to aquatic organisms, may cause long-term adverse effects in the aquatic environment.
R62	Possible risk of impaired fertility.

This information is based on our current knowledge and is intended to describe the product for the purposes of health, safety and environmental requirements only. It should not therefore be construed as guaranteeing any specific property of the product.
